Dear Parents,

As we anticipate and receive the results of this year's AP scores, we wanted to provide you some context and information to help you process the scores your student will see. Students typically can log into their College Board account during the week of July 4th and see their scores. The schedule for score access can be found on the College Board website (https://apscore.collegeboard.org/scores).

One common question is how these scores will be used to award college credit for your student. This website https://apstudent.collegeboard.org/creditandplacement/search-credit-policies provides an easy search tool to look at various colleges and universities policies on awarding AP credit for students.

Additionally, we wanted to provide some generic information for you on how other students in America who took the various AP tests did. The information in the chart on the next page comes directly from the Vice President of Advanced Placement and Instruction at College Board and reflects the overall national scores by percentage for each test. The tests are scored on a 5-point scale, and each test has a multiple choice and essay/free response component. The score is a combination of a student's achievement on both parts of the test. This will give you an idea of how other students did on the tests taken by your student.

Wheaton Academy is committed to pushing students with a rigorous academic program, and our AP classes are a key part of that equation. We applaud your student for making the commitment to take these rigorous classes and tests and believe that in addition to providing the possibility of earning college credit, they also prepare students for college because of the yearlong work done in the classroom.

Thank you for your commitment to helping your student grow through challenge and hard work in the classroom.

Course	5's	4's	3's	2's	1's
